

HIGH PERFORMANCE AND DURABILITY

Wallside Windows provides the most durable, longest lasting glass available for your home. The spacer between the panes is designed with a corrugated shape that adds strength and bent corners, not notched or open joints. This creates a continuous impermeable metal barrier around the entire perimeter, keeping moisture out and insulating argon gas in. Altogether, our insulated glass units achieve the window industry's lowest failure rate, giving you peace of mind and confidence that the windows in your home will not fail.

- ORGANICALLY SEALED
- DUAL SEAL SILICONE / ALUMINUM SPACER
- DUAL SEAL SILICONE / STAINLESS SPACER **Wallside Windows**

PREMIUM GLASS

TURN OUR DOUBLE PANE WINDOWS INTO TRIPLE PANE PERFORMERS

Wallside Windows Premium Glass gives your home the energy performance of a triple pane window with the ease and use of a double pane window. An added layer of Indium Tin Oxide on the roomside glass surface keeps the energy in your home for enhanced performance. The top of the line insulated glass helps your home stay warm and cozy in the winter by blocking heat loss to the cold weather outside. It keeps your home cool and comfortable in the summer by rejecting the sun's heat and rays. In short, Wallside Windows Premium Glass provides year around efficiency and comfort for both cold winters and hot summers.

Typically, 75% of the exposed surface of a window is glass, which makes the glass such an important part of the window's performance.
